

A-MODULO

Fioriera modulare componibile in fila continua, particolarmente indicata per l'utilizzo in giardini, parchi e spazi urbani. A-modulo può essere interamente riempita di terra, ed essendo priva di ostacoli all'interno, permette una diffusione omogenea delle radici ed uno sviluppo ottimale delle piante nascondendo inoltre eventuali impianti di irrigazione e cavi elettrici. A-modulo viene consegnata in kit facilmente assemblabili e fornita completa di "enkadrain" da posizionare su pareti e fondo grigliato, utile a dissipare il calore assorbito dal metallo e a drenare l'acqua in eccesso.

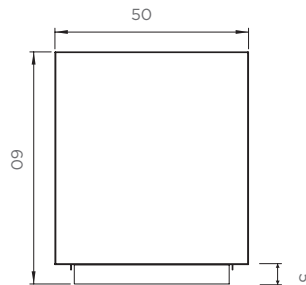

Modular flower pot, composed by different on-line sections, particularly suitable for use in gardens, parks and urban spaces. A-modulo can be completely filled with soil, and having no obstacles inside, plants can have an optimal development and a homogenous growth of the roots, hiding the presence of irrigation systems and electrical cables. A-modulo is delivered in an easily assemblable kit and it comes complete of "enkadrain" to be placed on sides and perforated base, useful to dissipate the heat absorbed by the metal and to drain any excess of water.

ENKADRAIN

Materiale coibente e filtrante, costituito da doppio TNT e reticolato plastico, utile a dissipare il calore assorbito dalla lamiera e a drenare l'acqua in eccesso.

Insulating filter material, that consists of TNT and entangled flagments, fit to dissipate the heat absorbed by the metal and to drain any excess of water.

FINITURE / FINISHES

Cor-Ten

Acciaio inox AISI 304 satinato

Acciaio inox AISI 304 mastral brunito

Acciaio inox AISI 304 verniciato RAL 9010

Acciaio inox AISI 304 noir sablé

Alluminio délabré

Cor-Ten

Satin stainless steel AISI 304

Bronzed mastral stainless steel AISI 304

Laquered RAL 9010 stainless steel AISI 304

Noir sablé stainless steel AISI 304

Délabré aluminium
