como

Designed with classical inspiration, like its unwound from a Roman Italian classic column and run flat across the front of the cabinet. It's giving a beautiful texture and the ability for light to reflect in highlights and shadows across the cabinet. The top being set in from the ends and the front, gives a little bit more of a presentation, allowing you to use the top for a beautiful sculpture. Bronze tone paint, very subtle metallic look which shows when it catches the light. Custom sizing and materials are available to suit your individual home and style.
