Description

Dining table for outdoor use

Structure

Powder coated steel cleaned and treated with an electrolytic process of hard iron phosphatisation. This pre-painting guarantees a higher resistance to corrosion and it removes polluting substances. Its effect is reinforced with a following nanotechnology anticorrosive treatment and with an electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

Top

Stones or HPL grey.

All the stones used for Roda furniture are brushed with a natural effect and protected by an invisible treatment. Serizzo: granite stone of white/grey color.

Carrara marble: a metamorphic stone made of crystals and carbonate of microscopic size which gives a uniform aspect. It has a pearl-white color and slight grey veins.

HPL (High pressure laminate) of a great quality with a characteristic black heart, very resistant to wear and tear, humidity, steam, UV, fungi, spores and mould. It is self-extinguishing and it is class 2 fire resistant; it does not contain chlorine or asbestos and it is certified by Fira Institute for coming in contact with foodstuff.

Weight

Stone top 177kg; HPL top 142kg

Maintenance

Steel

In case of exposition to weather conditions, it is recommended to wash regularly the product with mild tepid water. In case cleaning is needed, use a neutral soap (UNIVERSAL CLEANER RODA) and warm or mild water.

Dry immediately to avoid stains and halos caused by water.

Eventual rusty formation must be treated with a rust stopper and eventually touched up with the paint stick in the same color of structure, supplied by RODA.

Stones

All stones are protected by an anti-spot treatment, but it is recommended to clean with care the surface to maintain their original aspect in the course of time. In case of spots, it is necessary to clean them immediately with natural soap and absorbent cloth in order not to remove the protection treatment.

For a normal cleaning, use a soaked cloth with distilled water. Only in case of obstinate spots, use few drops of ammonia diluted with water. In any case, try it in a hidden part to verify its efficiency and its no-damaging effect. Do not use abrasive products, acid substances, chemical aggressive solvents.

HPL

Maintenance and cleaning: use a water-soaked cloth and in case of persistent spots, use a neutral soap (Universal Cleaner RODA). Dry carefully. Do not use abrasive products, acid substances, chemical aggressive solvents.
