## stella console

*pictured as console table*

### stella console

The Stella console is a design with defining features that always offers effortless elegance, this is what the Stella console is. The negative detail separates the top from the base, not only are finishes and textures different, but it also offers refined metal handles. Mix up the woods to suit your requirements or keep them as per our designer's brief. Top is made from MDF high gloss lacquer with European Beach wood which has been stained for the base.
