

## PIPER 012 coffeetable

### Design

Rodolfo Dordoni

### Description

Side table

### Structure

Aluminium frame treated with electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

### Top

#### Hpl

High pressure laminate extremely resistant to wear, impact, scratch, moisture, heat and stain; it has good hygienic and anti-static properties.

#### Teak

The high weather resistance is due to its compact wooden structure, where an oily sap flows. The oil is water-repellent: for this reason teak cannot get water-soaked and it cannot rot or deform significantly as the others woods do, if left outside. The oiliness gives teak a particular softness which makes it pleasant to touch, as well as a great resistance to weather, temperature, parasite attacks and insects.

#### Farsena

It has a typical gray-brown color and an uniform structure with shades of red and salts. The brushed finish and the stain-resistant treatment with opaque effect preserve the natural appearance of the stone and its pleasantness to the touch.

#### Luna Stone

Sandstone with a typical grey/light blue color, brushed with a natural effect.

#### Carrara Marble

The slabs of marble have a pearlwhite color and slight grey veins which do not decrease the value of the stone. The Carrara marble used for our products is treated with acid, with a natural effect and it is protected with a light oil-repellent treatment.

### Weight

HPL: 20 kg - Teak: 19 kg - Pietre: 50 kg

### Storage Cover

Available

Ø 110 (43 1/4)

40  
(16)

## Maintenance

### Aluminium

In case of exposition to weather conditions it is recommended to wash regularly the product with mild and fresh water. If the product needs a thorough cleaning, use a neutral soap (UNIVERSAL CLEANER) and warm or hot water.

Dry immediately to avoid stains and halos caused by water. Brush following the direction of polish (if the product is not painted) and use a microfiber cloth to obtain a better result.

### Top

Use a water-soaked cloth and in case of persistent spots, use a neutral soap UNIVERSAL CLEANER. Dry carefully. Do not use abrasive products, acid substances, chemical aggressive solvents.
