

THE FLYNN MODULAR

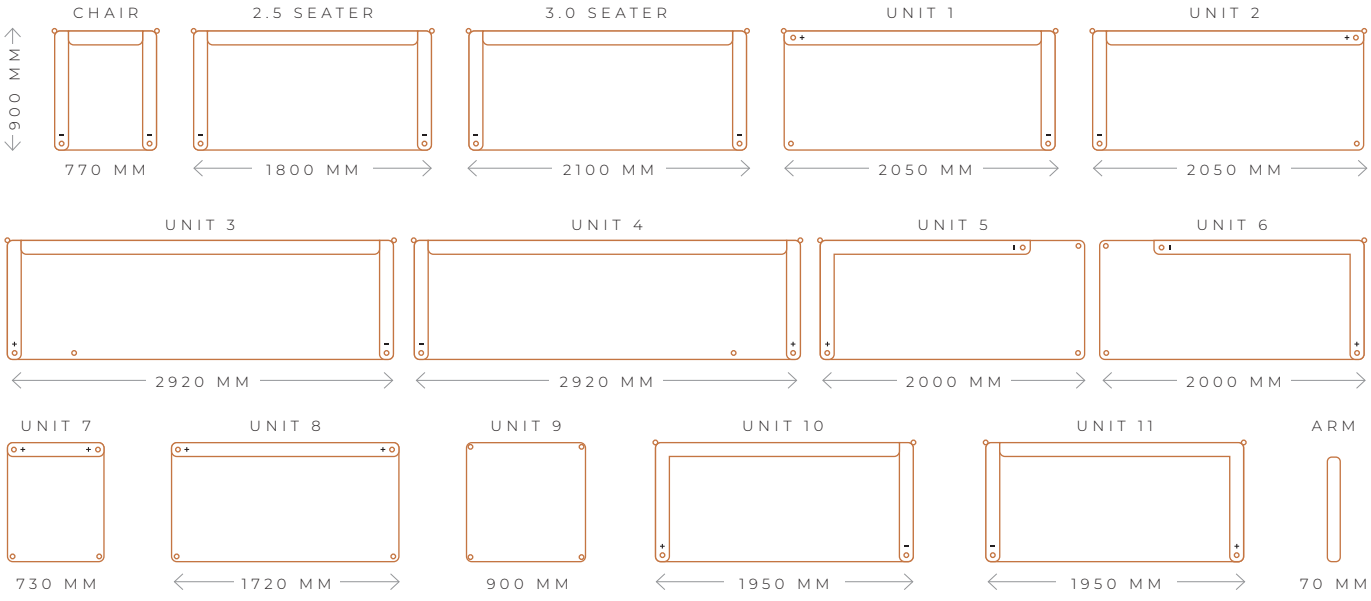

DESIGNED + MADE IN NEW ZEALAND

FLYNN

The arms are recessed back and forward, resulting in a lovely negative detail on the back showcasing the round leg detail.

Not only do you have a distinction between the back and front of this elegant design, but also an added French Flanging. This is located on the front-facing arms and back, and the sides of the back cushions. Noticeably you see no joins as the arms, border, seat and back cushions are all wrapped. To create a piece which is not only economical but functional, comfortable and compatible this design is made from metal to achieve the fine features you see here.
